INDUSTRY EXPERIENCE

Member of Technical Staff, Microsoft AI Mar 2026 - present
Built foundation model on multi-modal generation. Shipped **MAI-Image** across Microsoft platforms.

Staff Research Scientist, Meta Superintelligence Lab Sep 2025 - Mar 2026
Research on multi-modal foundation models and visual generation.

Staff Research Scientist, ByteDance Seed May 2021 - Sep 2025

- Initiated, designed, and launched Bytedance's image editing foundation model (**SeedEdit** and **SeeDream**), led model design, core implementation, and end-to-end data pipelines for mining, synthesis, processing, and captioning. Landed in 2024 as the industry's first general-purpose image editing model and integrated across major ByteDance products as a core AI capability.
🔗 <https://seed.bytedance.com/en/tech/seededit> 🔗 <https://seed.bytedance.com/en/seedream40>
- Research on unified models to bridge visual understanding and generation for language, image and video.
- Invented multi-view diffusion models (**MVDream** and **ImageDream**) for 3D generation, establishing the first 3D generative framework that delivers both stability and generalizability.
🔗 <https://mv-dream.github.io> 🔗 <https://image-dream.github.io>
- Research and products on image synthesis, editing and video generation.

Research Intern, NEC Lab of America May 2019 - Aug 2019
Research on universal face representations for unconstrained face recognition.

Research Intern, Visa Inc. May 2018 - Aug 2018
Research on face image recognition and generation.

EDUCATION

Ph.D. Computer Science 2016 - 2021
Michigan State University
Supervisor : Anil K. Jain

B.S. Computer Science 2012 - 2016
Shanghai Jiao Tong University
IEEE Honored Class
